

CLEAN ENERGY

BIO-FERMENTED, SPROUTED BROWN RICE PROTEIN

WITH FERMENTED SUPER GREENS

NutriDoc

IDEAL ENERGY BOOST DURING DETOX!

Harnessing nature's power of fermentation to enhance absorption, this protein powder provides the unique combination of organic bio-fermented sprouted brown rice protein with fermented super food. The protein provides energy while maintaining muscle mass. The fermented super foods act to detoxify the liver while alkalising and cleansing the body. Added 'citrate form' minerals further help the body to buffer acidity common to both the modern western diet and the metabolic by-products we naturally produce.

Fermented foods have the added benefit of providing pre-digested, highly absorbable proteins, minerals, vitamins, enzymes and healthy bacteria further enhancing their benefits and helping to keep the immune system and digestive system supported.

"...protein powder would be even better if it had added fermented greens and minerals to further enhance the cleansing process and alkalise the body."
