

The TincTract™ Difference

*(As different from a glycerate, meaning a product processed with another solvent with that solvent removed and glycerin thereafter added.) A liquid herbal **glycerite** is a liquid herbal product made using an all-natural solvent mixture of purified water and glycerin to extract a botanical's components. Until the advent of the proprietary 'Genuine TincTract® Made' liquid herbal glycerite processing technology, other commercially available liquid herbal glycerites were (and still are) weak preparations possessing low potency and inconsistent results due to utilizing outdated and antiquated liquid glycerite processing techniques better suited to alcohol based extraction methodologies. Other companies still make their herbal glycerites using those antiquated approaches while Cedar Bear Naturales™ utilizes its Earth-Friendly cutting-edge proprietary glycerite processing technologies.*

TincTract® made liquid herbal concentrate products 'category defining' in that they are both correctives/restoratives and builders/sustainers of health, possessing incredibly complex marker constituent and micro-nutritional density.

• The points that make a "Genuine TincTract® Made" liquid herbal product so different from any other liquid herbal product – Or any other herbal product, for that matter:

- A proprietary trade secret technology unique only to **Cedar Bear Naturales™**.
- 'true' Alcohol-Free – No alcohol ever! (Alcohol denatures and renders inert many bio-actives, constituents and co-factors).
- Multi-step TincTract® process takes weeks (average 60 to 90 days) and in some instances, months (up to 180 days), depending on the herb and/or herb part being processed.
- Multiplex & Clinically-based – Individually processed single herb TincTracts® are blended (as post-blends) in special proprietary ratios to create the unique **Cedar Bear Naturales™** 'multiplex' formulas, which work synergistically together, resulting in amazingly effective products.
- All products are Kosher Certified and Halal and Vegan compliant.
- Products are made in a new upgraded Kosher Certified/cGMP-HACCP facility – manufacturing is fully documented and under stringent Kosher certified and FDA mandated cGMP standards, and HACCP compliant standards.

- "Genuine TincTract® Made" Brand Liquid Herbs Are Made In A New Upgraded Kosher Certified/cGMP/HACCP Facility.
- Intrinsically 'steric protected' and very stable (unique to "Genuine TincTract® Made" products) – No refrigeration after opening, arrested REDOX, and a stated 4-year expiration date is put on the label.
- No preservatives or chemical additives added. Naturally preserved by the glycerin ratios and the "Genuine TincTract® Made" process itself.
- No other like it - the 7th Generation "Genuine TincTract® Made" brand process is actually patentable! Even so, we've chosen to keep it proprietary.
- Products are 'Ratio-Intact Synergy Sparing Poly-Constituent' based. All of an herb parts constituents in their ratio-intact synergy!
- Liquids are concentrated, potent, highly absorbable and bio-utilized by the body.
- TincTract® products simply taste great!

Multiplex Formulating Approach:

The multiplex approach to formulating herbal products used by Mr. Robinson includes, but is not limited to, the following considerations: Clinicals; pharmacology & pharmacognosy; chemistry compatibility factors; mineral 'signature' group profiles; pH factoring; organoleptics (i.e tactile sensory & smell/taste considerations); herbal energetics (biometaphoric qualities): palatability (flavor); etc. Many of these considerations are of a highly proprietary nature such as trade secret mathematical constructs dealing with the unique energetic profiles each herb and its parts possess in relation to the other herbs it will be mixed with. Mr. Robinson's unique multiplex approach has not previously been done for combining herbs into potent, efficacious and *good tasting* liquid herbal products in this fashion in the West (or possibly elsewhere), which explains why Cedar Bear Naturales™ 100% alcohol-free liquid herbal glycerite products are unique and the most innovative in all the world.

Pure Health TincTract™ Herbal Liquid Extracts are uniquely manufactured by CEDAR BEAR NATURELES
