

THE FIRST BATCH HAS COME AND ALMOST GONE...!

If you haven't tried Hydro-ReGen yet, be sure to place your order. Stock is running out fast of this groundbreaking new product.

**"ARE YOU SICK AND TIRED OF BEING SICK AND TIRED?"**

## Regenerate with Hydro-ReGen

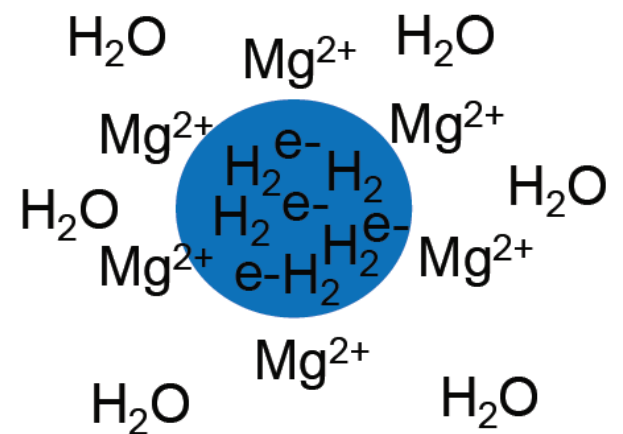

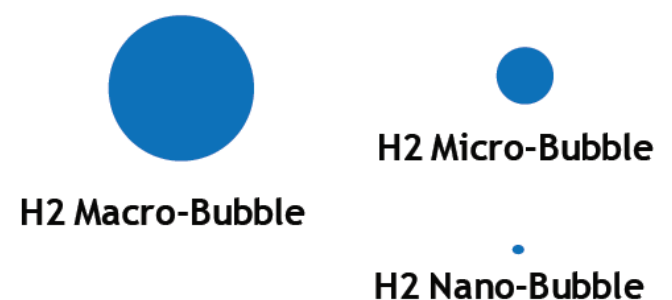

Hydro-ReGen is a mineral complex which generates a unique form of molecular hydrogen. Unlike any other H<sub>2</sub> products in the world, the molecular hydrogen delivered by Hydro-ReGen is not dispersed into solution nor as a gas before ingestion. Rather the body produces the nano-bubbles of hydrogen molecules within the intestinal tract releasing a massive yield of hydrogen ions that by their nature have free movement within the cells to scavenge free radicals at a level never before possible from a supplement.

The patented ingredient blend in Hydro-ReGen is delivered by capsule so there are no binders or fillers to worry about either.

The Hydro-ReGen proprietary formula contains a blend of alkaline minerals and inulin which produce Hydrogen Nano-Bubbles when ingested. These nano-bubbles remedy the limitations of other hydrogen therapies.

1. To be effective it is important that hydrogen ions do not bind to other elements or compounds prior to being ingested into the body as this will neutralise the effect of the hydrogen. Unlike other hydrogen therapies, the Nano-Bubbles produced by Hydro-ReGen remain in an unbound, stabilized form until ingested.

2. Hydro-ReGen produces Nano-Bubbles whereas other forms of hydrogen therapy such as Electrolysis and Gas Saturation can only produce larger Macro and Micro-Bubbles. These larger bubbles have a tendency to dissipate quickly rendering them non-effective. Nano-Bubbles however, will deliver up to 5 times more hydrogen to the body compared to a therapy which relies on the use of larger macro or micro bubbles. Hydro-ReGen delivers the most effective, highest potency Molecular Hydrogen.

**Possible Structure of H<sub>2</sub> Nano-Bubble**

## The Next Gen is Hydro-ReGen

Hydrogen therapy has been researched for decades with dozens of papers published confirming the positive health benefits it offers. Among them are;

- Powerful Selective antioxidant
- Reduced inflammation
- Improved insulin sensitivity
- Improved mitochondrial function
- Improved cell communication
- NRF2 activity activation
- Improved athletic performance
- Reduced lactic acid production

Hydro-ReGen is the next generation of molecular hydrogen therapy offering greater product stability, higher therapeutic potency and greater efficacy than traditional hydrogen therapies.
